EPOS Centre

EPOS Centre International Limited is an authorised Distributor to Posiflex Technologies Inc. covering Nigeria and the West African Sub Region. ECIL has been mandated under the authority of Posiflex Taiwan and Germany - Europe, Middle East & African (EMEA) Jurisdiction as the licensed operator for sales and technical support to the West African territory. The partnership scope covers all Posiflex Products and After Sales Services within the Posiflex brand, Patent and accreditation.

The primary purpose and scope of this relationship is to promote the deployment of Electronic Points of Sale terminals produced by Posiflex Technology Inc. across the West African Sub-region. We are therefore pleased to introduce to you the array of products and services within our robust bouquet.

We will also be very disposed to integrating our EPOS Touchscreen systems with your already existing Point of Sale (POS) terminal for enhanced performance, usage and satisfaction of your merchants/ clients.

ID Plastic Card Printers

DED offer card printers from Datacard, Evolis and Zebra, three of the world's leading brands of on-demand plastic card ID printing.

The card printer range consists of a wide selection of models suitable for producing simple, single colour business cards, up to full colour, dual sided cards with holographic lamination on plastic pvc cards. All card printers are supplied complete with Windows drivers for 2000, XP, Vista and most are compatible with Windows 7. All card printers come with cables ready for connection to any software package.

Added features across the range include Hi/Lo-Co switchable magnetic card stripe encoders and contact and contactless (MIFARE) smart card options. Whatever the requirement and size of business, there is a pvc card printer to suit the application.

SP25 Plus Datacard ID Card Printer

As the most affordable ID system in the SP Series line, the Datacard® SP25 Plus card printer is a smart choice for producing a variety of attractive photo ID cards or badges comfortably within your budget. This simple, flexible printer offers full-colour and monochrome capabilities as well as rewritable card printing that reduces the time, cost and waste of reissuance.

Print regular and reusable cards with one printer.
Update schedules, loyalty points and other details.
Expect easy operation and maintenance.

Outstanding colour picture ID card printing
Convey a professional image on your photo ID cards or badges with one-sided, full-colour or single-color dye sublimation printing and edge-to-edge coverage.

Rewritable card printing
Save money with photo ID cards that can be printed, erased and rewritten hundreds of times. These environmentally friendly cards also reduce waste in your ID card program.

Manual card feeding
Accommodate low-volume applications with simple, one-at-a-time card or badge printing.

Easy ribbon loading
Save time and effort with quick-change, error-free ribbon loading. Card printer ribbon cartridges are reusable to minimize waste.

Features Include:

- Direct to card dye sublimation / resin thermal transfer
- Print speed of up to 120 cards per hour full colour
- Colour or Monochrome Printing on various thicknesses of Plastic Cards

SD260 Datacard ID Card Printer

The Datacard® SD260 card printer puts value right on your desktop. Save time and increase workday efficiency with this best-in-class card printer, ideal for many ID card issuance and id badging applications.

Produce vibrant and crisp images with TrueMatch™ technology
Experience extreme reliability with TruePick™ card handling
Support your environmental commitments with Earth-friendly features
Increase productivity with speeds that are over 33% faster than competitive printers in the same class

Engineered for Earth-friendly performance.
Now your ID card issuance can be fast, efficient - and green. The SD260 is an ENERGY STAR® qualified printer, and in addition, biodegradable cores with EcoPure® additive and recyclable parts and packaging make it the industry's first environmentally friendly desktop card printer.

Advanced technology for superior image quality.
New TrueMatch™ printing technology creates vibrant, crisp and clean credentials that are both secure and visually impressive. The SD260 printer lets you produce predictably outstanding images by emulating the sRGB industry standard colour space for improved colour management.

Intuitive operation simplifies card printing.
There's no learning curve with the SD260 printer. The printer display panel automatically alerts users when supplies are running low. Installation and printer operations are easy to understand with the helpful documentation tools provided with the XPS Printer Driver installation. The browser-based printer manager makes it easy to control printer settings.

Superior speed and reliability for worry-free printing.
Never worry about jamming again with TruePick™ card handling. You can save work time and increase productivity by experiencing the fastest print speed in its class.

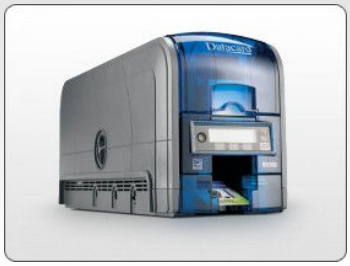
Compact size creates more room on your desktop.
The SD260 card printer fits on any desktop and is ideal for many card printing applications. It is equipped with a 100-card input hopper and 25-card output hopper for easier desktop functions, with the option for single-card feed and extended 100-card output hopper.

Features Include:

- Direct to card dye sublimation / resin thermal transfer
- Easy-to-use printer display panel
- Print speed of up to 200 cards per hour, one sided (YMCKT)
- 100 card input hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

SD360 Datacard ID Card Printer



Bring even more value to your desktop with the Datacard® SD360™ card printer. Increase productivity and save work time by issuing secure, two-sided ID cards and badges with this best-in-class card printer. Ideal applications include small- to medium-sized businesses, schools, clubs and hospitals.

Save time with automatic two-sided card printing
Increase productivity with industry-leading print speeds
Produce vibrant and crisp images with TrueMatch™ technology
Greatly reduce the possibility of jamming with TruePick™ card handling

Issue secure credentials more easily with automatic two-sided printing.
Create customized cards and badges with automatic two-sided printing. The SD360 card printer produces outstanding, dual-sided ID cards that are both visually impressive and easy to produce.

Superior speed for higher productivity.
Reduce the hassle of jamming with Datacard's exclusive TruePick™ card handling. Work time and efficiency can both be increased with the SD360 card printer, which produces clean credentials at industry-leading speeds.

New technology prints brighter, high-quality images.
Impress cardholders with the crisp, clean images and vibrant colours printed by the SD360 card printer. Datacard's exclusive TrueMatch™ printing technology closely matches the colours on your card to the colours on your screen. Produce two-sided cards in full-colour, up to 256 shades per colour panel.

Intuitive operation simplifies card printing.
There's very little learning curve with the SD360 card printer. Printer operations are easy to understand with the help of the intuitive soft-touch LCD panel. Load cards, replace supplies and access all the industry-leading features from one location on the compact SD360 printer, which includes a built-in 100-card input hopper and 25-card output hopper.

All the right connections for easy set-up
Standard, built-in Ethernet and USB ports, and the browser-based Printer Manager, help you integrate the SD360 printer into just about any application or typical IT environment.

Engineered for Earth-friendly performance.Save energy and strengthen corporate environmental commitments with the Earth-friendly and ENERGY STAR® qualified SD360 card printer, which is built to consume less electricity than its predecessors. Biodegradable supply cores, recyclable materials and power-down button set new benchmarks for environmentally responsible card printing.

Features Include:

- Direct to card dye sublimation / resin thermal transfer
- Easy-to-use soft touch LCD panel
- Print speed of up to 155 cards per hour, two sided (YMCKT-K)
- 100 card input hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards

SP75 Plus Datacard Dual Sided Card Printer

Choose the Datacard® SP75 Plus card printer to protect people, facilities and critical assets in government, corporations, universities and other organisations that require high security. This powerful and versatile printer issues technologically advanced IDs that maximize card security and durability.

Elevate the security of ordinary ID cards.
Laminate one or both sides of cards.
Protect IDs from a wide range of threats.

Versatile card lamination
The SP75 Plus printer can be configured with one standard laminator and a second optional laminator. Both can apply Datacard DuraGard® virtual edge-to-edge laminates that cover 95% of the card to increase security and durability. With both laminators, you can apply any combination of security laminates or protective topcoats in a single pass, or apply different laminates to each side to improve cost-efficiency.

Flexible, high-quality printing
This printer makes it easy to print a variety of secure IDs. Choose from one- or two-sided printing, both of which deliver superior dye sublimation quality and true edge-to-edge coverage. You can also take advantage of vivid, full-colour output or single-color printing.

Ultraviolet fluorescent printing
Strengthen card security with variable text ultraviolet (UV) fluorescent printing. Fluorescent text can be seen only under UV light, which makes it easy to validate the authenticity of the card and severely hinders any attempt at forgery.

USB and Ethernet connectivity
Plug this printer into a computer and start issuing cards in minutes with your choice of USB or 10/100 Base-T Ethernet connectivity, both of which come standard.

Quick-change supplies
The SP75 Plus printer makes it fast and easy to print many different kinds of secure IDs with quick-change, error-free ribbon loading, as well as laminate and topcoat cartridges that can be replaced in seconds.

Features Include:

- Direct to card dye sublimation / resin thermal transfer
- Laminating station as standard
- Print speed of up to 175 cards per hour front side YMCK ribbon with fron side lamination
- 100 card input hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards

SR200 Datacard Retransfer ID Card Printer

The Datacard® SR200 retransfer card printer gives cost-conscious issuers an affordable way to issue single-sided cards with high-quality, full-colour images. It enables over-the-edge printing on a variety of materials, and can be configured with an optional laminator.

Produce photo IDs easily and cost-effectively.
Save space with the printer's compact design.
Protect cards and ribbons with electronic locks.

Optimal image quality
Retransfer printing technology delivers vivid results with over-the-edge coverage for a wide range of applications. The SR200 printer processes cards in landscape orientation to minimize unwanted dye transfer. It also reproduces a wider colour gamut than competitive offerings, which improves image gradation, tonal reproduction and image contrast.

Optional laminator
The optional laminator can apply Datacard® topcoats or Datacard® DuraGard® laminates to help extend card life and strengthen card security.

Maximum security
Electronic locks control access to cards and ribbons. The printer also offers the security erase feature, which protects sensitive cardholder data by blocking out black text on used YMCK and YMCKF ribbons.

Easy operation
An LCD panel provides helpful status updates for operators. The 100-card input hopper can be refilled during printing. Ribbon and retransfer film cassettes simplify loading.

Excellent material compatibility
Use the SR200 printer to reproduce high-quality images on a wide range of card materials, including PVC, ABS, PET, PET-G and polycarbonate.

Features Include:

- Dye sublimation retransfer printing
- LCD user panel
- Print speed of up to 120 cards per hour, four colour, one sided
- 100 card input hopper
- Colour or Monochrome Printing on various thicknesses of Plastic Cards

SR300 Retransfer Datacard Retransfer ID Card Printer

The Datacard® SR300 retransfer card printer allows cost-conscious issuers to produce high-quality, full-colour, dual-sided cards efficiently and affordably. This compact printer enables over-the-edge printing on a wide range of materials. It can also be configured with an optional laminator.

Print cards on heavy-duty card materials.
Encode magnetic stripes and smart card chips.
Protect cards and ribbons with electronic locks.

Optimal image quality
Retransfer printing technology delivers vivid results with over-the-edge coverage for a wide range of applications. The SR300 printer processes cards in landscape orientation to minimize unwanted dye transfer. It also reproduces a wider colour gamut than competitive offerings, which improves image gradation, tonal reproduction and image contrast.

Encoding capabilities
The SR300 printer encodes both contact and contactless smart cards. It prints up to the edge of the smart chip or directly over embedded chips. It also encodes magnetic stripes.

Optional laminator
The optional laminator can apply Datacard® topcoats or Datacard® DuraGard® laminates to help extend card life and strengthen card security.

Maximum security
Electronic locks control access to cards and ribbons. The printer also offers the security erase feature, which protects sensitive cardholder data by blocking out black text on used YMCK, YMCK-K and YMCKF ribbons.

Exceptional ease of use
The SR300 printer makes it easy to load cards and ribbons. The display panel also provides helpful and timely status information for operators.

Excellent material compatibility
Use the SR300 printer to reproduce high-quality images on a wide range of card materials, including PVC, ABS, PET, PET-G and polycarbonate.

Features Include:

- Dye sublimation retransfer printing
- LCD user panel
- Print speed of up to 120 cards per hour, four colour, one sided
- 100 card input hopper
- Colour or Monochrome printing on various thicknesses of plastic cards

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

Tattoo Rewrite Evolis Rewritable Plastic Card Printer

The Evolis Tattoo RW is a printer for single-sided rewritable cards. It effortlessly matches all your expectations when it comes to flexibility, affordability, sustainable development, and regular data updates.

You can deliver a new card anytime it is required! The erase/write cycle is extremely fast and you can erase, encode, and reprint new data in a matter of seconds.

This revolutionary rewritable technology requires no ribbon, which translates into valuable savings. No need to throw away your cards each time you need an update: erase and reprint only updated data on your existing card!

Now with Tattoo RW, data encoded on magnetic stripes or on contactless chips can also be displayed and updated on the card surface. For example, loyalty points can be printed on a card and updated at each checkout.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- Print speed 8 seconds per cards(manual), 12 seconds (card feeder)
- 16Mb image memory
- 100 card detachable feeder (0.76mm Cards)
- 15 card output hopper capacity (0.76mm Cards)
- Direct thermal printing and erasing on rewritable material
- Maximum print area: 48 mm x 76 mm (1.89" x 2.99")
- 2 years (printer and print head), limited to 15,000 inserted cards

Zenius Evolis Single Sided Card Printer

With Zenius, Evolis unveils its new conception of plastic card personalization, with a clear focus on the user and unmatched printing quality. Zenius, the fi rst eco-designed printer, stands out with its optimized features and a Evolis High Trust® Evolis Premium Suite® software compact and sleek design.

Zenius benefi ts from the new consumables and the to provide ease of use and performance levels that set the new benchmark in the market.

Zenius is the one-stop solution to print high-quality single-sided cards, in monochrome or color, and encode technology cards, in single or small runs, for a variety of applications: employee badges, access control badges, payment cards, transportation passes, and more.

With a sound level of just 46 dB (A) and its amazingly small size, Zenius can be accommodated in virtually any environment, be it a welcome desk, a sales counter, or an offi ce desk. Zenius weighs 3.3 kg (7.3 lbs) and is the lightest printer in its category.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automaticdriver configuration
- Print speed over 120 cards per hour, edge to edge(full colour-single sided)
- 16Mb image memory
- 50 card input hopper capacity (0.76mm Cards)
- 20 card output tray capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Pebble Evolis Single Sided Card Printer

The Evolis Pebble4 is the ideal printer to seamlessly personalize your cards, on demand or in volume. The Pebble4 leverages a large selection of consumables and encoding options - magnetic stripes, contact smart cards and contactless cards - to personalize all your cards, from ID badges to the most sophisticated payment cards.

Here is a reliable printer with top-notch performance. Pebble4 guarantees fast personalization of cards by the unit and can also issue personalized cards in volume. You now have in your hands the perfect solution to personalize your cards at anytime.

Pebble4 sets the benchmark with a stunning throughput of 150 cards per hour in color and 1,000 cards per hour in monochrome, along with top-quality graphics. The printer benefits from a wide array of consumables designed by Evolis to keep a check on your costs. For a driver's license application, for example, using a half-panel ribbon can cut your cost by at least 40%.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automaticdriver configuration
- Print speed over 150 cards per hour, edge to edge(full colour-dual sided)
- 16Mb image memory
- 100 card input hopper capacity (0.76mm Cards)
- 50 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

Dualys Essential Evolis Dual Sided Card Printer

Dualys3 matches premium-quality graphics, with fast throughput and autonomy. This Evolis card printer comes with the latest innovations in consumables and encoding, and therefore, supports any type of cards while providing premium and unmatched efficiency.

For dual-sided color printing (YMCKO-K), Dualys3 stands out from the crowd as one of the fastest printers in its category, providing high-quality graphics, whether in color or in monochrome. With its dual-sided printing engine, Dualys rises to meet any ID need the user may have.

Dualys3 benefits from world-class technology that supports the most stringent standards to encode magnetic stripes, as well as contact or contactless smart cards. For example, Dualys3 delivers student IDs loaded with features: e-purse, access control to premises, transit pass, payment at the cafeteria and access to libraries.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automaticdriver configuration
- Print speed over 125 cards per hour, edge to edge(full colour-dual sided)
- 16Mb image memory
- 100 card input hopper capacity (0.76mm Cards)
- 100 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Primacy Single/Dual Sided ID Card Printer

The Evolis Primacy is a high-end id card printer that is easy-to-use, flexible and fast. When loaded with the Evolis cutting-edge encoding technologies, Primacy turns into the ideal solution to issue cards.

Primacy supports any requirement in card printing and encoding, in medium to large runs. This is the perfect option to deliver transportation passes, payment cards, identification badges, as well as multi-feature cards.

Primacy personalizes color cards in a record time. Up to 210 cards per hour for one side, and 140 cards per hour for dual-sided printing. The same machine can print on either one or both sides, and the dual-sided option can also be activated on-site. This flexible printer can also be fitted with additional options at any time, when magnetic and contact/contactless encoding are required.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automatic ribbon configuration
- Print speed over 102 cards per hour, edge to edge(full colour-dual sided)
- 16Mb image memory
- 100 card input hopper capacity (0.76mm Cards)
- 100 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Quantum Evolis Dual Sided High Volume Card Printer

The Evolis Quantum prints cards in dual-sided mode, in color or monochrome, and delivers more than 1,000 personalized cards per hour. This optimized throughput leverages two detachable and interchangeable hoppers with a large capacity of 500 cards each. Quantum personalization process that matches the flexibility of a desktop printer with the power of an industrial machine.

From card manufacturers to service bureaus or even banks and universities. It provides the fl exibility to meet any customer requirement at any time: identifi cation cards, loyalty cards, transport passes, event passes, student IDs, payment cards, calling cards.

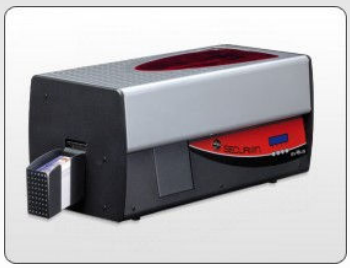
Quantum comes with a detachable and reversible encoding unit that can combine magnetic, smart contact and contactless encoders. With this feature, a card can be printed and encoded on the same side, without having to be fl ipped over. This speeds up the personalization. The separate encoding unit can be upgraded on-site with almost any smart chip encoder that simply needs to be connected to a dedicated electronic panel.

Features Include:

- Dye sublimation/thermal transfer dual sided print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automaticdriver configuration
- Print speed over 115 cards per hour, edge to edge(full colour-dual sided)
- 16Mb image memory
- 500 card input hopper capacity (0.76mm Cards)
- 500 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

Securion Evolis Secure Dual Sided Card Printer



The Evolis Securion is a one-stop solution for personalizing and laminating secure badges in a decentralized way. The printer seamlessly scales to meet growing concerns about security and data forgery, while greatly extending the lifespan of any card. The printer offers dual-sided operations on both the color-printing module and the lamination station. The badge is first processed through graphical and electrical personalization. Then, a protection film, in the format of a varnish or a patch, is applied by a hot roller over the full card surface. Printing, encoding and laminating a secure badge are carried out in a single pass.

It supports advanced encoding options that can all be combined to cater to any specific encoding requirement, including the most sophisticated.

The Securion deploys additional layers of security to guarantee safe operation: a central locking system that prevents access to consumables (cards and ribbons), a password-based access to the machine and a slot for a Kensington® anti-theft system.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & 2 LCD
- RFID ribbon technology for automaticdriver configuration
- Print speed over 95 to 120 cards per hour, edge to edge(full colour-dual sided)
- Dual Sided Lamination
- 16Mb image memory
- 100 card input hopper capacity (0.76mm Cards)
- 100 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation
- Reject box for 15 cards

ZXP Series 8™ Retransfer Card Printer

The Zebra ZXP Series 8 ID plastic card printer is based on new leading-edge software technology that enables high-performance printing and meets demanding enterprise needs for application integration and management.

Best-in-class through-put for printing, encoding and laminating due to its simultaneous 2-sided retransfer process plus efficient landscape print mode allows efficiency without loss of quality.

The ZXP's modular design allows for additional add ons to be easily fitted. These include: magnetic encoder, smartcard encoder, RFID encoder and ethernet interface.

A variety of interfaces are available including ethernet, USB and wireless allowing for easy integration into most environments.

Microsoft• ® Windows® certified drivers ensure application compatibility, ease of use, and investment protection in existing software infrastructures.

Features Include:

- WiFi, USB and Ethernet connectivity
- Single-card feed capability
- 150 card capacity feeder (30 mil)
- 15 card reject hopper (30 mil)
- 100 card output hopper (30 mil)
- i Series™ intelligent media technology
- Auto-calibration of media
- 21-character, 6 line LCD operator display
- 304 dpi (12.0 dots/mm) print resolution
- 64 MB memory standard
- Lifetime warranty on printhead
- 2-year limited warranty on printer
- Microsoft® Windows® certifed drivers

ZXP Series 3 Card Printer

The new Zebra ZXP Series 3 plastic card printers from DED offer affordable card printing for users with low to medium volume card printing requirements. Based on the popular Zebra P110 and P120 series, the ZXP Series 3 offers increased direct to card printing speeds of up to 160 cards per hour, field upgradeable encoding and Ethernet interface options as well as increased security features. The ZXP Series 3 printers are highly versatile and designed with ease of integration in mind - providing flexible connectivity options and an SDK for custom applications, the ZXP Series 3 is the best value in its class for printing and encoding photo ID, access control, gift cards, loyalty cards, membership cards and many other types of plastic cards.

The ZXP Series 3 may be compact enough to fit easily on almost any counter space in retail, leisure or hospitality environments, but don't let the size fool you, it's packed full of features that really speak for themselves. Offering affordable on demand card printing thanks to either single or dual sided model options; the ZXP Series 3 range offers contact and contactless (MIFARE) encoding and a secure issuance model which is perfect for secure financial cards. Thanks to EMV certified encoding and optional security features, the ZXP Series 3 is one of the only printers in this format that has a fully lockable cabinet enclosure which features not only lockable access to the inside of the printer, but also to the cards in the input hopper. This means that cards can be printed securely in the knowledge that only authorised personnel have access to any sensitive information. All models in the ZXP Series 3 range come with a Kensington lock to secure the printer to any counter top.

The ZXP Series 3 printers utilise host based image technology which significantly speeds up card printing time by shifting most of the hard work to the host PC, allowing the card printer to focus on printing the actual card. Thanks to the new and improved Zebra i Series ribbons which have been reformulated to enable high speed printing and high performance, cards printed on the ZXP Series 3 now offer improved durability , increased image quality and a faster throughput.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Easy-to-use operator control panel & LCD
- RFID ribbon technology for automatic driver configuration
- Direct to card print speeds of up to 160 cards per hour
- 100 card input hopper capacity (0.76mm Cards)
- 50 card output hopper capacity (0.76mm Cards)
- Colour or Monochrome Printing on various thicknesses of Plastic Cards
- Self-cleaning cartridge system
- Automatic ribbon synchronisation

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

P100i Single Sided Colour Card Printer

The Zebra P100i colour card printer makes personalised cards fast, easy, and affordable. This budget-friendly printer produces single-sided full colour or monochrome cards and offers a variety of optional features not typically available in a product in this class, such as Ethernet connectivity and Smart Card encoding. In moments, this single-feed card printer can print and/or encode unique cards for a variety of markets.

Based on the Zebra P110i and P120i design, the P100i offers card printing at an affordable price at the entry level market.

All Zebra card printers come with a 2 year warranty including printhead on all printers!

Features Include:

- Dye sublimation/thermal transfer print technologies
- Single sided printing - Colour or monochrome
- Load-N-Go ribbon cartridge with integrated card cleaning roller
- RFID ribbon technology for automatic driver configuration
- CardSense single-card feed
- 100 card integrated card storage
- 6 seconds per card monochrome
- 35 seconds per card full-colour (YMCKO)
- Automatic ribbon synchronisation
- Windows Drivers 2000, XP, Vista and Windows 7

P110m Single Sided Value Monochrome Card Printer

Reliable, compact and easy to use, the P110m is Zebra's most affordable monochrome single sided card printer.

The sleek design uses high strength plastics and advanced electronics for reduced size and weight and outstanding performance, all at a great price. The P110m delivers consistent, high quality printing and trusted Zebra dependability.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Single sided printing - Monochrome
- Load-N-Go ribbon cartridge with integrated card cleaning roller
- RFID ribbon technology for automatic driver configuration
- 100 card integrated card feeder
- 7.2 seconds per card monochrome
- Automatic ribbon synchronisation
- Windows drivers 2000, XP, Vista and Windows 7

P110i Single Sided Value Colour Card Printer

Reliable, compact and easy to use, the P110i is Zebra's most affordable colour card printer. The sleek design uses high strength plastics for reduced size and weight.

Print in full colour or monochrome single sided and choose from automatic multicard feed or CardSense single card feed.

The printer lid opens at the touch of a button to allow easy access for cleaning and ribbon changes, which in turn are made simple thanks to drop-in loading ribbon cassettes with integrated cleaning roller. The ribbons feature Zebra's new i series intelligence which have automatic driver setup and ribbon low notification.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Single sided printing - Colour or monochrome
- Load-N-Go ribbon cartridge with integrated card cleaning roller
- RFID ribbon technology for automatic driverc onfiguration
- 100 card integrated card feeder
- 30 seconds per card full-colour single-sided(YMCKO)
- Automatic ribbon synchronisation
- Windows drivers 2000, XP, Vista and Windows 7

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

P120i Dual Sided Value Colour Card Printer

The P120i is the latest addition to the Zebra Technologies range of plastic card printers available from DED. It is set to revolutionise the industry thanks to a host of new design features designed to make card printing easier, faster and more reliable than ever before.

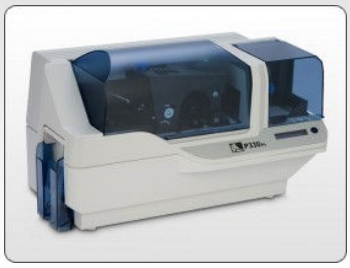
A new card input feeder doubles as a card flip-over unit which not only saves space but for the first time brings automatic dual sided card printing to entry level market.

The printer lid opens at the touch of a button to allow easy access for cleaning and ribbon changes, which in turn are made simple thanks to drop-in loading ribbon cassettes with integrated cleaning roller. The ribbons feature Zebra's new i series intelligence which have automatic driver setup and ribbon low notification.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Dual sided printing - Colour or mononchrome
- Load-N-Go ribbon cartridge with integrated card cleaning roller
- RFID ribbon technology for automatic driver configuration
- 100 card integrated card feeder
- 30 seconds per card full-color single-sided (YMCKO)
- Automatic ribbon synchronisation
- Windows drivers 2000, XP, Vista and Windows 7

P330m Advanced Single Sided Monochrome Card Printer



Easy to use and loaded with options, the P330m single-sided monochrome card printer produces reliable and high performance printing at an affordable price.

The P330m plastic card printer includes a revolutionary new angled card feeder design. It also features a powerful LCD display, the printhead brackets open twice as wide as the P310 ID card printer and it comes with 16MB memory as standard.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Single sided printing - Monochrome
- LCD for immediate printer status
- 16 MB image memory standard
- USB or USB with built-in Ethernet
- Bi-directional driver communication
- 300 dpi print resolution
- 100 card integrated card feeder (220 high capacity feeder option)
- 5.2 seconds per card monochrome
- Windows drivers 2000, XP, Vista and Windows 7

P330i Advanced Single Sided Colour Card Printer

The next generation of the world's leading card printer, Zebra's P330i is the most powerful and flexible card printer in its class. Easy to use, this single-sided card printer produces reliable and high performance printing at an affordable price.

The P330i ID card printer includes a revolutionary new angled card feeder design. It also features a powerful LCD display, the printhead brackets open twice as wide as the P310 ID card printer and it comes with a 16 MB memory as standard.

Optional features for the Zebra P330i include Ethernet connectivity and pass through contact and contactless smart chip encoding options.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Single sided printing - Colour or monochrome
- LCD for immediate printer status
- 16 MB image memory standard
- USB or USB with built-in Ethernet
- Bi-directional driver communication
- 300 dpi print resolution
- 100 card integrated card feeder (220 high capacity feeder option)
- 5.2 seconds per card monochrome
- 25 seconds per card full colour single sided (YMCKO)
- Windows drivers 2000, XP, Vista and Windows 7

P430i Advanced Dual Sided Colour Card Printer

The Zebra P430i is part of the latest generation of Zebra's most popular card printer family, with tens of thousands of printers installed worldwide. Designed and built for demanding environments, the P430i delivers reliability and performance for high volume card production.

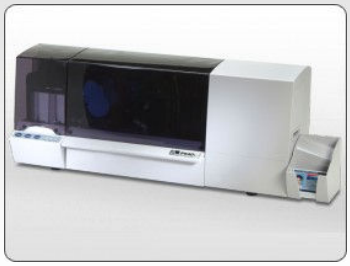
Expansion options for networking and card encoding give the P430i the flexibility to meet specific requirements.

Affordable and easy to use, the Zebra P430i is the new leader in dual sided performance card printers.

Features Include:

- Dye sublimation/thermal transfer print technologies
- Dual sided printing - Colour or monochrome
- LCD for immediate printer status
- 4 MB image memory
- USB or USB with built-in Ethernet
- Bi-directional driver communication
- 300 dpi print resolution
- 100 card integrated card feeder (220 high capacity feeder option)
- 12 seconds per card monochrome
- 27 seconds per card full colour dual sided (YMCKO)
- Windows drivers 2000, XP, Vista and Windows 7

P630i Dual Sided Colour Card Printer with Single Sided Laminator



For durable, secure cards of exceptional quality, the Zebra P630i is the best choice. This card printer creates long lasting, tamper resistant identification cards that are difficult to counterfeit. The P630i features dual-sided printing and single-sided, waste-less lamination.

The P630i features a range of options and newly engineered electrical and mechanical designs to enhance its reliability and performance. In addition to ease-of-use, it provides superior print quality and a low cost per card. Now with new security features, the Zebra P630 offers additional options such as linear barcode reading, monochrome printing and contact smart card station.

Cards printed on the Zebra P630i last between four and seven years and can withstand a variety of stresses, including abrasion, UV light exposure, temperature extremes, water, chemicals, bending and folding.

Features Include:

- Dye Sublimation print technology
- Micro card positioning card transport for enhanced print quality
- Covert text printing of less than 15 micron high characters
- Grey on grey hidden text printing
- Single pass single sided wasteless lamination
- Flip-over unit for automatic printing of both card sides
- Easy to use operator control panel
- Plastic case with viewing window
- High speed colour printing/laminating - 85 seconds per card (YMCK and 1.0mil lamination front and reverse)
- 150 card input hopper capacity (0.76mm Cards)
- Self cleaning ribbon system
- Automatic ribbon and laminate roll synchronisation

P640i Dual Sided Colour Card Printer with Dual Sided Laminator

For durable, secure cards of exceptional quality, the Zebra P640i is the best choice. The P640i's design provides reliability for continuous-print applications thanks to it dual roll laminating system which applies near edge linerless laminate patches to both sides of the card simultaneously, in a single pass. This means fast production of highly durable cards protected by laminate patches on both sides.

The patented P640i card transport mechanism allows highly accurate card positioning, resulting in high-quality colour printing and precision details that are difficult to copy. This level of accurate control also allows printing of 'micro text' of less than 15 micron high and even 'grey on grey' printing which to the naked eye looks like a plain block but under magnification is clear as printed text.

Other security features include custom design hologram laminates, UV printing ribbon, operator ID key option and ID Log software that creates a unique record of each card produced.

Cards printed on the Zebra P640i last between four and seven years and can withstand a variety of stresses, including abrasion, UV light exposure, temperature extremes, water, chemicals, bending and folding.

Features Include:

- Dye Sublimation print technology
- Micro card positioning card transport for enhanced print quality
- Covert text printing of less than 15micron high characters
- Grey on grey hidden text printing
- Single pass dual sided wasteless lamination
- Flip-over unit for automatic printing of both card sides
- Easy to use operator control panel
- Plastic case with viewing window
- High speed colour printing/laminating - 30 seconds per card (YMCK and 1.0mil lamination front and reverse)
- 150 card input hopper capacity (0.76mm Cards)
- Self cleaning ribbon system
- Automatic ribbon and laminate roll synchronisation

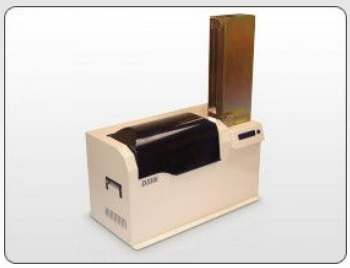
D330i Large Capacity Kiosk Card Printer



Based on the leading Zebra P330i engine, the D330i has been designed with all of the P330i features plus the addition of input hoppers of 200 or 400 card capacity. This makes the D330i ideally suited to kiosk environments where minimal user intervention is required.

Enclosed in a hard wearing metal case and with the addition of fixing locations at its base, the D330i can be easily integrated into a kiosk. Options on the D330i include a 3 Track Hi/Lo-Co switchable magnetic encoder and Mifare Contactless encoding.

Features Include:

- 200 or 400 card capacity
- Card out and card low warnings
- Uses standard Zebra Windows drivers

TCP300 Rewritable Card Printer

The TCP300 is a visual card reader/writer capable of erasing and reprinting the information on the front of a special 0.25mm "Leuco" card in as little as 3 seconds, up to a maximum of 500 times. It is also capable of printing single use cardboard tickets. Printing high contrast black or blue text at up to 203 dpi on any colour background, the TCP300 is ideal for environments where cards need to be reused again and again, such as loyalty, membership and appointment cards or even visitor badges.

The TCP300 is available with a USB or RS232C Serial interface and comes with Windows 2000 and XP drivers. This re-writable card printer even has a maintenance indicator to warn the operator of the optimum time to run a head cleaning cycle in order to obtain the highest resolution card printouts.

Features Include:

- Thermochromic visual/magnetic card reader/writer
- Uses either 0.20mm Ricoh or 0.30mm Leuco cards
- Large re-writable graphics area of 40mm x 58mm
- Cards can be re-written up to 500 times
- 3 track ISO standard magnetic encoding on to hidden stripe
- USB Interface
- 230VAC mains PSU

TCP400 Rewritable Card Printer

The latest addition to the TCP series from Star Micronics, this new printer can take plastic cards of 0.76mm in thickness and erase and re-write the information on them in as little as 4 seconds, up to a maximum of 500 times. Printing high contrast black or blue text at up to 203 dpi on any colour background, the TCP400 is ideal for environments where cards need to be reused again and again, such as temporary access control and visitor management applications as well as loyalty, membership and appointment cards.

The TCP400 is fitted with both USB and RS232C Serial interfaces and comes with Windows 2000 and XP drivers. This re-writable card printer even has a maintenance indicator to warn the operator of the optimum time to run a head cleaning cycle in order to obtain the highest resolution card printouts.

Features Include:

- Thermochromic visual/magnetic card reader/writer
- Uses 0.76mm thick thermochromic cards
- Erases and re-prints each card approx 500 times
- Print area of 40mm x 66.8mm
- High speed throughput of 4 seconds per card
- Serial RS232C & USB & interfaces (Ethernet option)
- 3 track switchable (300, 650 or 2750 Oersted) magnetic stripe encoder
- 300,000 card cycles MTBF Mifare proximity card option available
- Cleaning indicator
- Dimensions: 119(W) x 270(D) x 132.5(H) mm
- Weight 2.5Kg
- Windows Drivers XP/2000

PCPR Thermal Card Printer

The Axiohm PCPR thermal printer offers a cost effective solution for producing single use cardboard cards. With a print speed of up to 80mm per second and the ability to print single or double length ISO format cards, the PCPR is ideally suited to applications such as visitor badges, loyalty cards, phone cards and appointment cards.

It's compact, yet stylish, design combined with manual front loading allows the PCPR to fit right on any reception desk or point of information. A print resolution of 8 dots per mm allows the printing of crisp text, graphics and barcodes.

Features Include:

- Direct thermal print technology
- Up to 80mm per second printing speed
- Print width of 48mm
- Resolution 8dots/mm
- Barcode Types: UPC-A, UPC-E,EAN 13, EAN 8, Code 39, 12/5, Code 128
- Mechanical reliabilty: 50000 single cards & 25000 double iso cards
- Dimensions: 230(W) x 115(D) x 95(H) mm
- Weight 600g
- Windows Drivers XP/2000

Card Printer Software

Working closely with software developers N5 and ExhangeIT, DED offer a range of card printer software packages available for plastic card production, visitor management and label printing.

These card printer software packages offer a host of features tailored specifically for each individual application, are simple and straightforward to use and represent excellent value for money.

CardExchange Card Design, Database & Printing Software

CardExchange is in use worldwide providing a powerful yet cost effective solution which allows government agencies, universities, corporations, as well as small businesses to issue high-quality secure credentials.

In practice, it frequently happens that companies use several card layouts that do not need to be redesigned very often. Consequently, users of card-printing programs, rather than a designer-oriented interface, need a simple accessible window where they can quickly select a card layout, find the correct employee or student, take a photograph and print their identity card. In many cases, in-line electronic personalization must be done as well. Besides functionality for loading cards, defining fast database connections with powerful filters, performing simple card management, printing directly to Windows printers, etc, it is now also possible to create an internal view or query. CardExchange also includes its own card-layout designer. From now on, issuing new identity cards will be done in a few seconds.

VIDEO - CardExchange Installation
VIDEO - CardExchange Activation

Features Include:

- Designed for Windows 2000/XP/Vista/7
- Five editions to suit different applications
- Powerful card designer
- Print to any Windows printer
- Twain photo capture
- User definable filters
- Wizard based data definition setup

CardExchange Small Business Server Edition Card Design, Database & Printing Software

CardExchange SBS is the network printing edition of the standard CardExchange software package.

In a lot of situations, users are not keen on having a local licensing system as tied to an individual PC as it is different users who may wish to use the application, not specific PCs. Of course for these occasions CardExchange® can be combined with a hardware dongle but for east of use, a licence server editions is far simpler to manage.

With the Small Business Editions from CardExchange® you can centralize your licenses. That means that you install the CardExchange® license manager on a central location in your organization, like a shared Server that can be reached by all computers that will contain the CardExchange® application.

All card designs and database definitions are also held centrally to simplify administration of the system. This means that if a card layout changes, the administrator makes the change on just 1 client and all others are automatically updated too.

The License Manager manages the licenses available. For example, you can install CardExchange® on any computer in your organization, which means that the application can be a part of your re-image policy. You have installed a SBS version with 10 client licenses. Everytime you start up CardExchange®, it will request a license from the license manager so you can have 10 CardExchange® clients running at the same time. When you start up computer number 11, the License Manager will inform the user that there are no licenses available anymore. When one of the CardExchange® clients closes the application, another computer can startup CardExchange® and work with the application.

The CardExchange® Small Business Edition is based on a package containing 5 clients and the license manager. Every package can be easilly extended with extra Client packages which contains 5 extra Clients. For large organizations we also offer the Enterprise Edition. This edition contains 100 Clients and will cover most of the need inside your organization.

Features Include:

- Server based licence management
- Designed for Windows XP/Vista/Win7
- Three editions to suit different applications
- Powerful card designer
- Print to any Windows printer
- Twain photo capture
- User definable filters
- Wizard based data definition setup

CardFive Vision Card Design & Database Software

CardFive Vision - from well renowned card printing software producers NFive, is the latest evolution of the popular CardFive software, designed for use with any plastic card or page printer.

CardFive Vision is available in four editions; Classic, LiteXL, Premier & Professional.

Classic is a basic design & printing software which supports drawing of text, lines, boxes & import of images. Magnetic stripe encoding and support for a limited range of barcodes is included. LiteXL adds additional barcode symbologies plus import of .csv & .txt text files and read/write connection to Excel data sources. Premier adds further functionality with support multiple card layouts and an Access .mdb data source. Finally, Professional adds full ODBC/SQL support, Proximity card encoding and Biometric support.

All editions of CardFive are protected by PenFive, a combined USB Pen-based installation package & security system that prevents the software being used if the USB pen is not connected. For added security, the Professional edition also features userdefinable password protection.

Designed for Windows 95/98/NT/2000/XP/Vista, CardFive Vision delivers all the features and power of the popular CardFive Software plus with a host of new features and design tools for printing plastic cards.

Download CardFive Updates Here

Features Include:

- Designed for Windows 95/98/NT/2000/XP /Vista
- Four editions to suit different applications
- PenFive USB installation package / licencing system
- Prints to any Windows printer
- Twain and DirectShow photo capture
- Database connectivity

DeskFive Electronic Visitor Management System

DeskFive is a very powerful, yet simple to operate visitor management system. It combines a host of powerful features to manage and track visitors and the employees they are visiting on site. The whole check-in procedure can be made simple by the use of a CardScan business card scanner (available separately). Simply insert a business card into the scanner and the check-in process is started. The card is scanned, a copy of it stored and all fields updated using Optical Character Recognition. A photograph of the visitor can also be captured and stored on their record and/or printed onto their visitor badge.

DeskFive holds a database of staff so that the visitor(s) can be quickly and easily assigned to the staff member(s) they are visiting. This can be linked to an existing MS Access or SQL database via ODBC. Once the staff member is selected, site route instructions can be printed for the visitor and automatic email notification sent advising of the visitor's arrival. Reports on visitor and staff locations, on/off site report and top visitors/staff can be easily printed. An emergency on-site report can be produced very quickly from the main screen showing all current visitors on-site at that moment - a very important feature should the building need to be evacuted.

More than one printer can be defined for the printing of badges, maps/instructions and reports enabling you to use, for example, an A4 page printer for reports and a plastic card printer for badges. DeskFive can also assign a badge number, allowing you to use pre-printed badges instead of printing them. The Star TSP800 thermal badge/report printer (available separately) is ideal for use with DeskFive as it features a compact footprint, 112mm wide paper width, 150mm per second print speed and has unique Windows printer drivers, allowing it to be used to produce both badges and perfectly readable, scaled down A4 reports all from the same paper roll.

Features Include:

- Intelligent typing aid
- Built-in interface for CardScan business card scanner
- PenFive USB dongle licence
- Photo acquisition (Twain and Video For Windows compliant)
- Real time visitor tracking
- Easy-to-analyse history reports
- Emergency evacuation report
- Automatic e-mail notification of visitor arrival
- Automatic printing of guidance route instructions
- Card, label or page printer output via Windows drivers
- Network compatible
- MS Access or SQL database versions
- Designed for Windows 95/98/NT/2000/XP /Vista
- Supports multiple companies & check-in/check-out locations
- Visitor pre-booking function

TimeFive Time Attendance Software

A powerful, user-friendly software package designed to manage and track employee's movements during work hours, TimeFive provides greater control in busy offices, factories or anywhere there is a need to monitor the hours worked, staff absences, define shifts, or plan and organise holiday allowances.

To make tracking employees very simple, TimeFive uses fingerprint scanning technology in place of a conventional time card. The fingerprint scanners can be easily installed at entry or exit points and connected to the host computer via an RS232C, RS485C or Ethernet connection. Thanks to this flexibility, employee's entering and leaving the building can be accurately timed, and employers can be sure that a secure entrance system is maintained.

Featuring an intuitive on screen graphical interface, TimeFive allows the operator to manage a complete staff database, whilst also providing the flexibility and versatility to print out monthly reports of cumulated work hours for individual employees. These can be easily exported in CSV format for accounting & payroll purposes - ideal for shift work or flexible working hours.

A completely customisable combination of hardware and software which can be configured to suit individual application needs, TimeFive is available in 10, 25, 50 or unlimited user versions and runs on any Windows 2000 or XP computer.

Features Include:

- Easy to use with friendly and intuitive interface
- MultiCompany, MultiDepartment
- Highly flexible
- Shifts Management
- Exceptions are handled automatically
- Average deviations
- Holidays, Absence and Vacation schedulers
- User logins
- Option to choose between Smartcards and/or Fingerprint
- Accounting export

AccessFive Access Control System

AccessFive is the result of 3 years R&D to integrate complex concepts to create a "packaged" Access Control software with a short learning curve and all the potential that you may require.

AccessFive lets you create groups of users, describe them, and define privileges and restrictions according to your work environment. Divide your environment into well defined zones that you can cross check with groups or individuals to organize the Access rights. You are then able to get statistics by person, time, zone or other indicators that you choose to obtain detailed information about your company's activity.

AccessFive is a fully integrated Access Control and Monitoring System that offers high security level granted by the use of iCLASS® as well as biometrics technology.

It allows simple managing of different Access Control terminal types with its easy to use management system, from setup to full production.

Fully compatible with HID Global™ networked access control solutions, AccessFiveintegrates VertX™ and Egde™ series devices seamless and effortlessly.

Features Include:

- Interlock
- Door timed alarm
- Two men access
- Controlled application login
- Group permissions
- Time tables
- Validity and expirey dates per token
- Full event viewer
- Calendar analysis
- Data mining
- Zones and subzones definition
- Door specific configuration
- Device mapping

CardStudio ZMotif Card Printer Software

Zebra® ZMotif CardStudio is an easy-to-learn, easy-to-operate professional card-design and card-issuance software suite. Whether you're creating simple or complex designs, CardStudio offers a version for every application with three editions: Classic, Standard and Professional. Compatible with all current and legacy Zebra card printers – including both direct-to-card and retransfer – CardStudio makes designing, encoding, printing and connecting to databases fast and efficient. And the option to print via direct-to-printer (D2P) technology optimises print quality and ensures seamless design and card encoding.

Upgrades from the Classic and Standard editions to the Professional edition are available simply by using a software licence key. The Face Snap plug-in is also available as an option for automatically cropping and optimising images for production. Try out any or all of the features in CardStudio with the Demo edition. Once you purchase an edition, moving it to another PC or upgrading to a more advanced edition is simple with a software licence key.

Features Include:

- Designed for Win XP/Vista/Win7
- 3 editions to suit different applications
- Prints to any Zebra printer
- Twain and DirectShow photo capture
- Database connectivity (version dependent)

ID Card Production Packages

Below is a list of items required to produce an ID card:

1. Plastic ID card printer
2. Software to design card, capture/store employee details and print cards
3. Ribbons
4. Cards
5. Camera
6. Holder and lanyard to display the printed card

To make sourcing these items simpler, DED has produced a range of packages designed to suit different card printing volumes and security requirements:

Package	Volume	Dual Sided	Printer
1	Up to 3000 per year	No	Datacard SP25
2	Over 3000 per year	No	Datacard SD260
3	Over 3000 per year	Yes	Datacard SD360
4	Over 3000 per year	Yes	Datacard SP75

Datacard 1-2-3 Easy ID Card Production Package 1 Entry Level Single Sided

Just set up your card printing system and begin producing full-color photo IDs in minutes with the Datacard 1-2-3 Easy ID Card Production Package - no software expertise necessary. The feature-packed kit includes everything you need to quickly, easily and cost-effectively make professional-quality identification, security and commerce-related cards.

In addition to a Datacard full-color, single-sided SP25 card printer, available with or without magnetic encoding, it contains exclusive Datacard 1-2-3 Easy ID Software (optional upgrade version available) allowing exceptionally simple and fast to creation custom cards. You also get a USB 1.3 MP digital camera for capturing ID photos, and supplies for printing up to 120 cards. With this high-value and easy-to-use solution, even smaller organizations have the power to print cards with the quality and professional appearance required in today's market.

Features Include:

- SP25 Datacard Printer
- Entry-level ID Works Software
- 1.3 MP Camera
- 120 plain cards
- 4 colour YMCKT Ribbon
- Cleaning kit

Datacard ID Card Production Package 2 Medium to High Volume Single Sided

This single sided ID card production package has been put together for those who have the need to print over 3000 cards per year - this package is most suited to medium volume and low security applications.

Offering on demand plastic card printing with the Datacard SD260 single sided ID card printer, this package comes complete with everything needed to get a system up and running, including CardFive Vision Premier card design software, webcam and enough consumables to print 500 cards. This package is also available with CardExchange professional card and print manager software.

This ID card production package is perfect for office use due to the fast print speed of the Datacard SD260. The Datacard SD260 is a dye sublimation printer capable of printing full colour cards in just 25 seconds or monochrome cards in just 4 seconds. With an LCD for immediate printer status and USB interface, integration is a snap.

Ideal applications include photo ID cards, employee badges, membership cards and loyalty cards.

Features Include:

- Datacard SD260 ID Card Printer
- CardFive Premier design, database and print software
- USB webcam
- Full colour ribbon 500 images
- 500 x plain white cards
- 500 x open faced card holders
- 500 x break-away lanyards

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

Datacard ID Card Production Package 3 Medium to High Volume Dual Sided

This dual sided ID card production package has been put together for those who have the need to print over 3000 cards per year - this package is most suited to medium volume and low security applications.

Offering on demand plastic card printing with the Datacard SD360 dual sided ID card printer, this package comes complete with everything needed to get a system up and running, including CardFive Vision Premier card design software, webcam and enough consumables to print 500 cards. This package is also available with CardExchange professional card and print manager software.

This ID card production package is perfect for office use due to the fast print speed of the Datacard SD360. The Datacard SD360 is a dye sublimation printer capable of printing dual sided full colour cards in just 27 seconds or monochrome cards in just 12 seconds. With an LCD for immediate printer status and USB interface, integration is a snap.

Ideal applications include access control cards, personalisation of bank cards, corporate ID cards and secure ID cards.

Features Include:

- Datacard SD360 ID Card Printer
- CardFive Vision Premier design, database and print software
- USB webcam
- Full colour ribbon 500 images
- 500 x plain white cards
- 500 x open faced card holders
- 500 x break-away lanyards

Datacard ID Card Production Package 4 High Volume with High Security Dual Sided

This dual sided ID card production package with high security has been put together for those who have the need to print over 3000 cards per year - this package is most suited to high volume and high security applications.

Offering on demand plastic card printing with the Datacard SP75 dual sided ID card printer and high security, this package comes complete with everything needed to get a system up and running, including CardFive Vision Premier card design software, digital camera and enough consumables to print 500 high security cards.

The Zebra Datacard SP75 produces highly durable cards protected by laminate patches on both sides that can last up to seven years. Offering high quality colour printing and precision details that are difficult to copy., plus with the Datacard DuraGard® virtual edge-to-edge laminates that cover 95% of the card, this increases security and durability.

This ID card production package is perfect for office use due to the fast print speed of the Datacard SP75. The Datacard SP75 is a dye sublimation printer capable of printing dual sided, laminated full colour cards in just 30 seconds. With an easy to use operator control panel and USB interface, integration is a snap.

Ideal applications include access control cards, drivers licenses and government and national ID cards.

Features Include:

- Datacard SP75 ID Card Printer
- CardFive Vision Premier design, database and print software
- 5 mega pixel digital camera with capture software
- Hologram laminate
- 300 x plain white cards
- 300 x open faced card holders
- 300 x break-away lanyards

Visitor Management Packages

DED offer a number of complete visitor management packages designed to suit the needs of a busy reception. All three packages are based around the DeskFive visitor management software which enables the operator to quickly and easily check a visitor in, associate them with a staff member and record the time they arrive and leave site. DeskFive also produces powerful tracking reports including an emergency evacuation report, an essential item to meet health and safety requirements.

Visitor Management Package 1 - Low Cost Badge Printer & Software

This entry level visitor management package has been put together for those who need a high speed visitor check in and low security. It is ideal for users who wish to produce a badge for short term use to include text such as visitor name and company, but no photo.

Offering quick and easy thermal badge printing with the Star Micronics TSP743 printer, this package comes with everything needed to get a system up and running, complete with DeskFive Premier visitor management software and enough consumables to print 500 visitor passes on card stock of 145 gsm thick. Blank passes are supplied on a roll and come pre punched with a slot, into which a clip fits to enable the visitor to attach the badge to themselves. Passes are automatically cut from the roll once printed.

DeskFive is a powerful, yet simple to operate visitor management system offering real time visitor tracking, automatic email notification of visitor arrival, plus relevant reports such as visitor history and emergency evacuation.

This visitor management package is perfect for counter top use, thanks to the compact footprint of the Star Micronics TSP743 which is capable of printing badges in just a couple of seconds. With simple, ‘drop in and print' easy paper loading, quiet operation and USB interface, integration is a snap.

Features Include:

- Star TSP743 printer
- DeskFive Premier visitor management software
- Roll of 500 thermal tickets
- 500 clips

Visitor Management Package 2 - TempBadge Printer & Software

This entry level visitor management package has been put together for those who need a high speed visitor check in and medium security. It is ideal for users who wish to produce a badge for short term use to include text such as visitor name and company, but no photo.

Offering quick and easy thermal printing with the Star Micronics TSP828 printer, this package comes with everything needed to get a system up and running, complete with DeskFive Premier visitor management software and enough consumables to print 1000 TempBadge time delay visitor passes which will expire automatically one day from the time of issue. TempBadges come pre punched with a slot, into which a clip fits to enable the visitor to attach the badge to themselves.

DeskFive is a powerful, yet simple to operate visitor management system offering real time visitor tracking, automatic email notification of visitor arrival, plus relevant reports such as visitor history and emergency evacuation.

Visitor Management Package 3 - TempBadge Printer, Software & Camera

This visitor management package has been put together for those who need a high speed visitor check in and medium security. It is ideal for users who wish to produce a badge for short term use to include text such as visitor name, company and a photo.

Offering quick and easy thermal printing with the Star Micronics TSP828 printer, this package comes with everything needed to get a system up and running, complete with DeskFive Premier visitor management software, digital camera, photo capture software, tripod and enough consumables to print 1000 TempBadge time delay visitor passes which will expire automatically one day from the time of issue. TempBadges come pre punched with a slot, into which a clip fits to enable the visitor to attach the badge to themselves.

DeskFive is a powerful, yet simple to operate visitor management system offering real time visitor tracking, automatic email notification of visitor arrival, plus relevant reports such as visitor history and emergency evacuation.

This visitor management package is perfect for counter top use, thanks to the compact footprint of the Star Micronics TSP828 which is capable of printing badges in just a couple of seconds. With simple, ‘drop in and print' easy paper loading, quiet operation and USB interface, integration is a snap.

Features Include:

- TSP828 printer
- DeskFive Premier visitor management software
- Digital camera
- Tripod
- 1000 TempBadges
- 500 TempBadge clips

Visitor Management Package 4 - Rewrite Badge Printer, Software & Camera

This visitor management package has been put together for those who wish to print a more durable and long lasting plastic badge for each visitor. It is particularly suited to users who produce a mixture of short term visitor passes and longer term contractor passes with photo's. This package comes with everything needed to get a system up and running - Printer, DeskFive Premier visitor management software, digital camera, photo capture software and tripod.

Offering quick and easy printing, the Star Micronics TCP400 plastic card printer is capable of erasing and reprinting each card approximately 500 times. This system is supplied with 200 rewritable cards which enables the user to produce 10,000 badges! Magnetic stripe or Mifare cards can be supplied instead of the standard card (at an additional cost) to enable the system to be further integrated into existing access control systems.

DeskFive is a powerful, yet simple to operate visitor management system offering real time visitor tracking, automatic email notification of visitor arrival, plus relevant reports such as visitor history and emergency evacuation.

This visitor management package is perfect for counter top use, thanks to the compact footprint of the Star Micronics TCP400 which is capable of printing badges in just a couple of seconds.

Features Include:

- TCP400 printer
- DeskFive Premier visitor management software
- Digital camera
- Tripod
- 200 Rewritable cards
- 200 Holders
- 200 Lanyards

Ribbons and Cards

DED's Card printer consumables cover a wide range of ribbons and cards for Datacard, Magicard, Fargo and Zebra Plastic ID Card Printers and are available for the complete range from each printer manufacturer.

These include plain, magnetic, smart and proximity cards; monochrome and full colour ribbons; plain and hologram overlays/laminates plus print foil for tippers in a variety of sizes and colours. DED also supply a range of cleaning materials which help to maintain various parts of the printer and ensure the highest reliability and print quality.

Datacard Ribbons

DED offer a range of ribbons for use with the Datacard plastic card printers. Datacard Ribbons are available in a variety of colours and finishes. DED hold stock of a variety of monochrome ribbons as well as the standard YMCKO dye sublimation and retransfer ribbons. Specialist ribbons capable of adding overlays, lamination and custom holograms are also available.

We stock all Datacard Ribbons for : SD260, SD360, SP75, SP25, SR200 and the SR300 printers.

Evolis Ribbons

DED offer a range of ribbons for use with the Evolis plastic card printers. Both cassettes and rolls are available in a variety of colours and finishes. DED hold stock of a variety of monochrome ribbons as well as the standard YMCKO dye sublimation ribbons. Specialist ribbons capable of adding overlays, lamination and custom holograms are also available.

We stock all Evolis Ribbons for : tatto, Zenius, Pebble, Dualys, Quantum and Securion id card printers.

Magicard Card Printer Ribbons

DED offer a range of ribbons for use with the Magicard plastic card printers. Both cassettes and rolls are available in a variety of colours and finishes. DED hold stock of a variety of monochrome ribbons as well as the standard YMCKO dye sublimation and retransfer ribbons. Specialist ribbons capable of adding overlays, lamination and custom holograms are also available.

Zebra Card Printer Ribbons

DED offer a very comprehensive range of genuine Zebra card printer consumables for use with all of the Zebra plastic card printers. Including standard 4 and 5 panel dye sublimation ribbons for regular 4 colour process plastic card printing, DED also offer ribbons featuring overlays, built in holograms with words or images and laminates as well as an extensive collection of colour monochrome ribbons.

Email: info@theeposcentre.com Or Tel: +234 (0)813 695 6369

Fargo Printer Ribbons

DED offer a comprehensive range of Fargo plastic card printer ribbons. All Fargo ribbons come on a cassette, making them easier to load, they also all come with an integrated cleaning roller to ensure that any dust or dirt inside the printer does not get transferred to cards being printed. Fargo ribbons come in an assortment of monochrome colours as well as the standard 4 colour process to print in full colour.

Plastic Cards (PVC)

DED offer an extensive selection of plastic cards for use in Datacard, Evolis, Magicard, Fargo and Zebra plastic card printers. From the industry standard plain white card though to thinner and thicker options, DED offer a large range of colour cards, all of which can feature magnetic strips or signature panels if required. Including cards with built in holograms and opacity marks, DED also offer self adhesive and 3 tag cards as well as Mifare cards.

ID Accessories

Choosing the correct badge holder for cards is as important as choosing the best card or printer. Badge holders, chains, lanyards and clips are available in a wide variety of sizes to suit many different applications.

Ranging from a simple vinyl holder with safety pin for a paper pass, to a PVC enclosed card badge holder for multiple cards or a safety break-away lanyard, DED offers one of the most comprehensive ranges available.

Due to the large range of accessories, it is impossible to list them all. If the item required is not listed below then please contact the Card Sales Team for a copy of DED's complete "ID Accessories" catalogue or to discuss custom printing or variants of the selection.

Lanyards and Neck Chains

The range of neck chains from DED are available manufactured from plastic or nickel plated steel in a variety of lengths from 30" to 38" finished in a range of colours. They are an ideal and low cost way of displaying a badge around the neck.

A more professional looking and comfortable option is a woven nylon lanyard. These are also available in a variety of lengths and colours but have the added benefit of being available in a variety of widths and with different attachments from a simple clip to a keyring or whistle.

They can even be custom printed with a corporate logo, slogan, department or message using a variety of different techniques depending on the budget and finish required.

For total safety a "break-away" attachment is available which quickly separates should the lanyard become caught - a must for wearers who operate machinery.

Badge Reels

Badge reels are an ideal way of keeping a swipe ID card secure whilst still allowing easy access to it when it is required.

The ID badge reels range from an all plastic item desgined for low usage applications to chrome plated metal reels for very heavy duty applications. The most commonly used range is the standard round clip or pin-on reel which is available in a variety of colours and with a range of different fixings for the card. A push button version is available which, when used, stays extended until the user presses the button. A square version of the reel is also available.

Reels can even be custom printed with a corporate logo, slogan or message in both the center of the reel and around the outer rim to compliment a companies ID, staff card etc.

Clips And Pins

The most simple way to display a badge or ID card is using one of the many clips available in this range. DED offer a selection of self adhesive safety pins and crocodile clips in both plastic and metal which simply stick to the rear of the card offering a very low cost solution ideal for visitor badges.

A more heavy duty fixing is available in the form of the strap clip range which fit through the slot in the card or card holder. These are available with either a crocodile clip or a more secure locking clip style mounted on straps with plastic or metal studs. The straps themselves are available in many different colours to match the individual card, holder or even corporate style.

Badge Holders

Badge holders are available in two main types. Flexible vinyl holders are available in a wide variety of sizes and with slots or holes to suit most clips, lanyards or chains. The back, frame or top bar can be clear or coloured. These badge holders are most suitable for temporary visitor badges and are not designed for heavy day to day use.

The rigid PVC/ABS range of badge holders are available to suit CR80 size plastic cards in a variety of thicknesses and even for multiple cards. Both portrait and landscape badge versions in a wide variety of colours can be supplied. A number of specialist badge holders such as secure enclosed holders from which the card badge cannot be removed without breaking it or rotating clip holders which have a built in clip which can be used in either landscape or portrait format are available. Rigid badge holders are very durable and can be used in the most rigorous of environments.

Luggage Tag Accessories

An ideal use for plastic cards is for the tagging and identification of luggage. Simply print a plastic card, punch a slot in it and add a leather strap, plastic loop strap or even a metal chain. Alternatively you can use the luggage tag holder into which you can insert a printed cardbard or paper sheet. Again this can be fixed to the luggage using any of the attachments in the range.

Tools

We offer a comprehensive range of tools to assist in the manufacture of plastic cards.

These include hand-held hole punches which allow you to cut a 5mm diameter hole for a keyring or chain and slot punches designed for cutting a 3 x 13mm slot for a lanyard or clip. These are available as hand-held items with or without a card guide and are ideal for occasional use.

For larger volume users we offer a manual desk-top punch with guide which makes production of large volumes of cards very simple.

In addition we offer badge racks & printer dust covers.

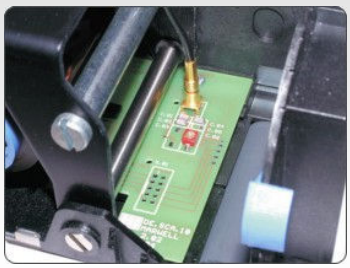
Add-On Kits

Smart Card Encoder / Reader



More and more applications are moving away from traditional barcoded or magnetic stripe cards, and so with this in mind, DED has introduced a range of contact (Smart Card) and contactless (Proximity) encoding modules for the Zebra range of plastic card printers (smart card readers / encoders). These kits allow a smart card to be passed through the printer and read/encoded and printed in one single, simple operation.

Software integration is simple as both demonstration software and dll files are supplied with each kit. For even greater ease of use the Mifare & HID kits are supported by our CardFive and CardExchange software packages. Both applications manage the complete setup of the smart card, PIN numbers, data positioning and encoding process making it incredibly simple to setup and use.

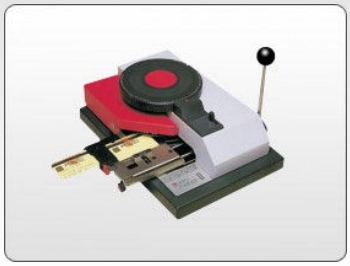
All kits are supplied with full fitting instructions making them simple to integrate into any existing printer. For greater flexibilty we can supply an SDK containing dll files & programming manual. Alternatively, DED can supply the printer with the smart encoder kit already fitted.

Features Include:

- Internal Smart Card Encoder Kit - Gemplus GCI400 (T=0, T=1)
- Internal Smart Card Encoder Kit - Gemplus GCI400 (PCSC)
- Internal Smart Card Encoder Kit - Orga Cream 130
- Internal Smart Card Encoder Kit - Towitoko
- Internal Proximity Card Encoder Kit - Mifare GCI680
- Internal Proximity Card Encoder Kit - HID Prox (READ ONLY)
- Internal Proximity Card Encoder Kit - I-Code OBID
- Internal Proximity Card Encoder Kit - Legic PHG/MIMIU-S
- Internal Proximity Card Encoder Kit - Hitag Feig ID RW01.
- Internal Smart Card/Proximity Card Encoder Kit - GCI410/Mifare GCI680

Card Embossers

CardMaker II Manual Card Embosser



The CardMaker II is one of the smallest manual desktop credit card embossers available on the market. Operation is simple, thanks to the large character selection drum and emboss handle. The current embossing position is shown at all times on a "dummy" card to ensure correct alignment. Up to 5 lines can be embossed at either 1/7" or 1/10" emboss pitch.

The standard drum features 55 characters including numeric in two font sizes and the full alphabet in one size. The drum can be expanded up to 100 characters should further characters or fonts on the card be required. The CardMaker II is ideal for any membership, loyalty or discount card.

Features Include:

- Simple operation
- Accepts CR80 ISO card
- 5 emboss lines (ABA standard)
- A-Z, 0-9 large numeric, 0-9 small numeric, :-/$.,& characters
- 55 character drum capacity (expandable up to 100 characters)
- 1/7" and 1/10" emboss pitch
- Card position guide

Bureau Card Printing

Introduction

DED offer a complete bureau service with fast turnaround times for plastic card printing. Backed by a wealth of experience and a variety of printers to tackle any job size from a few cards to thousands, DED are able to produce cards and offer support and advice from the initial design stages right through to delivery and beyond.

DED have the capability to print cards in full colour or monochrome, dye sublimation or re-transfer and the facility to offers cards magnetically encoded in a variety of ways ranging from magnetic stripe for cashless payment schemes or gift cards through to proximity cards for access control applications. Offering a wide selection of coloured and specialist cards to further extend design options, DED also offer cards in varying thicknesses – from 0.25mm to the 0.76mm industry standard, cards with signature panels, scratch off panels, even holographic and UV for extra security, sticker cards and magnetic backed cards, the list is extensive.

The in house design team at DED can accept designs in any format, be it a simple sketch, email, or a more developed idea on disk. DED can also accept entire databases and photographs in most formats for mass production of ID cards.

The potential of printed plastic cards is almost unlimited and can be adapted to suit any application including ID, access control, loyalty, discount, membership, gift, vouchers and cashless payment schemes to name just a few. To complete the service, DED offer a comprehensive range of card accessories from card holder and clips to lanyards and chains, or, if preferred, DED can offer an on-site bureau to take photos, enter data and produce cards on site instantly.

Access Control/Time & Attendance Products

TimeFive Time Attendance Software

A powerful, user-friendly software package designed to manage and track employee's movements during work hours, TimeFive provides greater control in busy offices, factories or anywhere there is a need to monitor the hours worked, staff absences, define shifts, or plan and organise holiday allowances.

To make tracking employees very simple, TimeFive uses fingerprint scanning technology in place of a conventional time card. The fingerprint scanners can be easily installed at entry or exit points and connected to the host computer via an RS232C, RS485C or Ethernet connection. Thanks to this flexibility, employee's entering and leaving the building can be accurately timed, and employers can be sure that a secure entrance system is maintained.

Featuring an intuitive on screen graphical interface, TimeFive allows the operator to manage a complete staff database, whilst also providing the flexibility and versatility to print out monthly reports of cumulated work hours for individual employees. These can be easily exported in CSV format for accounting & payroll purposes - ideal for shift work or flexible working hours.

A completely customisable combination of hardware and software which can be configured to suit individual application needs, TimeFive is available in 10, 25, 50 or unlimited user versions and runs on any Windows 2000 or XP computer.

Features Include:

- Easy to use with friendly and intuitive interface
- MultiCompany, MultiDepartment
- Highly flexible
- Shifts Management
- Exceptions are handled automatically
- Average deviations
- Holidays, Absence and Vacation schedulers
- User logins
- Option to choose between Smartcards and/or Fingerprint
- Accounting export

AccessFive Access Control System

AccessFive is the result of 3 years R&D to integrate complex concepts to create a "packaged" Access Control software with a short learning curve and all the potential that you may require.

AccessFive lets you create groups of users, describe them, and define privileges and restrictions according to your work environment. Divide your environment into well defined zones that you can cross check with groups or individuals to organize the Access rights. You are then able to get statistics by person, time, zone or other indicators that you choose to obtain detailed information about your company's activity.

AccessFive is a fully integrated Access Control and Monitoring System that offers high security level granted by the use of iCLASS® as well as biometrics technology.

It allows simple managing of different Access Control terminal types with its easy to use management system, from setup to full production.

Fully compatible with HID Global™ networked access control solutions, AccessFiveintegrates VertX™ and Egde™ series devices seamless and effortlessly.

Features Include:

- Interlock
- Door timed alarm
- Two men access
- Controlled application login
- Group permissions
- Time tables
- Validity and expirey dates per token
- Full event viewer
- Calendar analysis
- Data mining
- Zones and subzones definition
- Door specific configuration
- Device mapping

Card Printer Repairs and Servicing

Introduction

DED pride themselves on offering the highest level of card printer after-sales service, repairs, supporting customers and products to ensure many years of reliable operation.

DED offer a range of services from basic telephone support, card printer repair to swap-out services. Something to suit every card printer requirement and budget:

- Card Printer Repair
- Card technical support
- Software support
- Return-to-base card printer repairs
- Courier swap-out card printer service contract
- Printer and software rental

What do DED offer?

Card Printer Technical Support

DED offer free telephone and unlimited technical support and advice on all card printers, software and accessories. DED's engineers are trained to the highest standards by leading suppliers, enabling any questions on any of products to be answered.

Card Software Support

The majority of software supplied by DED is covered by free life time telephone support with upgrades available free of charge from the DED website. DED can also offer an on-line support service called 'go to assist' which provides access to customers PC's (only with authorisation from the customer) via an internet connection. This service requires the customer to have access to the internet.

Return-To-Base Repairs

For servicing non-urgent card printer repairs or pre service contract inspections, DED offer are turn-to-base servicing facility. Simply return the card printer to DED's service department who will carry out an inspection before providing an estimate of costs for the necessary work. Once approved, the work is carried out together with a full clean and check/adjustment of all card printer settings.

Courier Swap-OutService Contract

When a faster card printer repair time is required, DED can offer a next working day, courier swap-out service contract. With this service DED will send a loan card printer (of the same or higher specification) to the customer and at the same time collect the faulty unit and return it to DED. DED will carry out any repairs necessary and then return the printer to the customer by the same method. The contract covers all parts and labour (including the printhead in the first two years only).

Printer and Software Rental

For a very low cost DED will rent out any printer together with card software (if required) for any period from a single week upwards. All rental printers are supplied covered by a swap-out service contract for total peace of mind. Typical applications include University/College new year student registrations andexhibition/conference badging.
